Vessel Cargo

Sedna and Dataloy integration

The Sedna and Dataloy integration empowers Vessel Owners, Operators and Charterers teams to quickly get contextual information from Dataloy for time-sensitive Sedna messages and enrich them with voyage data to stay on top of optimising shipping operations for greater efficiency and transparency.

USED BY INDUSTRY LEADERS

POWERFUL DATA AT YOUR FINGERTIPS

A seamless integration that saves you time, removes manual processes and enables you to monitor and keep up to date with your voyages all within Sedna.

- Sedna messages are automatically tagged with Dataloy Job Tags in Sedna meaning messages are tagged, organised and routed to the right teams and team members
- Quickly access your voyage data when you need it by directly retrieving and displaying key voyage data from the Sedna Context Panel
- When you need the full power of Dataloy, easily jump to the tagged voyage with one click

ENSURE DATA ACCURACY

Vessel Owners and Operator teams can ensure data accuracy and remove manual work when communicating with contacts, colleagues and other teams by easily inserting relevant voyage data with one click.

- When replying and composing Sedna messages tagged with a Dataloy Job Tag, you can easily insert voyage data from Dataloy using the Sedna Context Panel
