

Sedna and Q88 VMS integration

The Sedna and Q88 VMS integration empowers Vessel Owners, Operators and Charterers teams to quickly get contextual information from Q88 VMS for time-sensitive Sedna messages and enrich them with voyage data to stay on top of optimising shipping operations for greater efficiency and transparency.

USED BY INDUSTRY LEADERS

POWERFUL DATA AT YOUR FINGERTIPS

A seamless integration that saves you time, removes manual processes and enables you to monitor and keep up to date with your voyages all within Sedna.

- Sedna messages are automatically tagged with Q88 VMS Job Tags in Sedna meaning messages are tagged, organised and routed to the right teams and team members
- Quickly access your voyage data when you need it by directly retrieving and displaying key voyage data from the Sedna Context Panel
- When you need the full power of Q88 VMS, easily jump to the tagged voyage with one click
