

SEDNA and Voyager Portal integration

The SEDNA and Voyager integration empowers vessel owners, operators, and charter teams to quickly get contextual information from Voyager for time-sensitive SEDNA messages, and automatically route and prioritise email communication while managing voyage documentation efficiently and transparently.

USED BY INDUSTRY LEADERS

POWERFUL DATA AT YOUR FINGERTIPS

Reply faster and automate prioritising and assigning emails through a seamless integration

- Automatically tag SEDNA messages with Voyager Job Tags, and keep them organised and routed to the right teams and team members
- Quickly access your voyage data, such as voyages, cargoes and schedules when you need it by directly retrieving and displaying critical voyage data from the SEDNA Context Panel
- Voyager Job Tags can be marked as Important so all emails relating to specific jobs are routed to

REMOVE MANUAL WORK WITH EFFICIENT DOCUMENT MANAGEMENT

Efficiently manage your voyage documents within SEDNA and Voyager

- Quickly upload and automatically sync documents such as invoices to the Voyager platform
- Create an audit trail and maintain data accuracy with all documents, uploaded from SEDNA messages, clearly marked and easy to identify within the Voyager platform
- When you need the full power of Voyager, quickly jump to the tagged voyage with one click
